

## **#PeopleMakePetrofac**

Savitha Haneef

The opportunities that have been given after joining Petrofac, it has been immense. My most memorable moment at Petrofac so far would be working with the operations team. I was working for Anasuria and all the anomalies in Anasuria I had to identify and put together a live register where we can record every single detail, every single anomalies we had to risk assess, and I put together the whole register and it's still live.

The decisions we make makes an impact on people, on the asset, on the environment. Safety is not an easy job, it's a rewarding job.

When I joined my colleagues, they were extremely approachable, genuine and I settled in really easily into Petrofac. So yes, I believe people make Petrofac.
