

## **#PeopleMakePetrofac**

Sameh

I think it is the adrenaline rush, the busier our calendar is the quicker I get up in the morning. Petrofac is a people business. It is driven by people. It is made up by people. It is the greatest asset. When you hear somebody sneezing outside of the corridor, you will hear, bless you in more languages than you can.

One of the projects I was really proud to work at is a refinery upgrade and water disposal treatment plant, the in-country value and our deep knowledge of the local supply chain has made all the difference.

The most valuable lesson I've learned in my career is to be gracious when successful and humble and not defensive, when not so successful.

People absolutely make Petrofac.
